

# BTS UNDERGROUND HEALTH & SAFETY COURSE

The tunnelling industry faces a buoyant future. Crossrail, Thames Tideway and Station Upgrades in the UK are all progressing. Key to the success of these projects is their completion with the best health and safety record possible.

Following the success of the Underground Health & Safety Course in 2010 it has been decided to repeat the two day format of the last two years to allow more time on specific subjects and include more discussion and debate.

The Health & Safety Course is organised and run by the British Tunnelling Society (BTS), an Associated Society of the Institution of Civil Engineers. The purpose of the course is to provide a comprehensive introduction to Health & Safety in tunnelling.

The course has been developed to focus exclusively on the underground environment. It aims to provide an introduction or enhance existing basic knowledge and develop an awareness of the particular health and safety challenges that working underground can pose.

Monday 28<sup>th</sup>  
&  
Tuesday 29<sup>th</sup>  
November 2011

The Institution  
of Civil Engineers  
London, UK

# BTS UNDERGROUND HEALTH & SAFETY COURSE

## Monday 28<sup>th</sup> November
